INSTRUCTION FOR IOS USERS

Follow these steps to install and run your PWA on an iOS device. Due to a bug in iOS, the PWA is not working in the iOS versions 13.0 to 13.2. Use iOS 13.3 or later instead.

If you're running iOS 13 and later, running your PWA on iOS requires enabling the Web SQL settings.

1. Go to Settings > Safari > Advanced > Experimental Features > and turn Disable Web SQL off.

Experimental WebKit Feature	s
Server Timing	
CSS Spring Animations	
Synthetic Editing Commands	
Block top-level redirects by third-p	
Visual Viewport API	
CSS Animations via Web Animations	
Web Animations	
Web Authentication	
WebGL 2.0	
WebGPU	
WebRTC H264 Simulcast	
WebRTC mDNS ICE candidates	
WebRTC Unified Plan	
WebRTC VP8 codec	
Disable Web SQL	

Once the above setting changes have been made, click here to download the app in Safari.
