Advanced radiotherapy treatment using state-of-the-art technology

Every patient's treatment journey is unique. At Life Oncology, we offer oncology care based on your care needs.

We are committed to providing access to the highest quality radiotherapy treatments to our patients. Through our commitment to value-based care and technology-driven solutions, we deliver targeted outcomes.

Our advanced technology includes:

The latest in Varian Trubeam technology

Daily onboard image guided radiotherapy (IGRT) to ensure correct patient positioning

Respiratory gating technology for tumour motion management, including the Deep Inspiration Breath Hold (DIBH) technique for left sided breast tumours

Ablative stereotactic body radiotherapy (SBRT) capabilities

Volumetric modulated arc therapy (VMAT) for rapid, precise delivery of radiation treatments and better healthy organ protection

Ultra-modern immobilisation

AI contouring software for precise organ at risk (OAR) delineation

Treatment and services

Our comprehensive treatments cater to patients with various forms of cancer, including, but not limited to:

Breast cancer

Gastrointestinal cancer

Colorectal cancer

Melanoma

Gynaecological cancer

Neuroendocrine / endocrine cancers
